

User Manual – How to Run this Web Application Locally

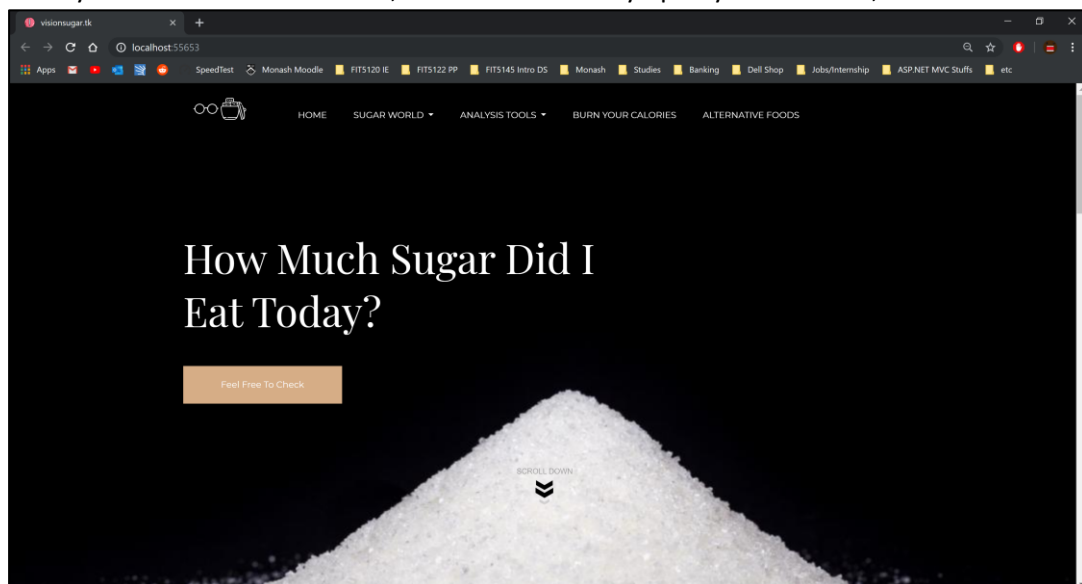

1. To run visionsugar web application locally you are required to have Visual Studio 2017 or newer. Please download *Visual Studio Community* [here](#).
2. Open the folder 'FIT5120_Saccharin_(xxxx2019)-Iteration x'
3. Inside the folder, please click on the  FIT5120_Project_Saccharin.sln to run the application.
4. After you click on the Project Solution above, Visual Studio IDE will automatically run, as shown below.

5. Next, click on the green arrow button at the top middle of the screen, as shown here:

6. Once you click the button above, it will automatically open your browser, as shown below.

7. This shows that you have successfully run the web application locally.

Thanks – Team Saccharin
